CONTAINERIZED WORKSHOP

WITH EACH PROJECT WE OFFER OUR CLIENTS TECHNICAL SUPPORT

Based on a fully containerized workshop and off course our experienced mechanics. We have containers combination of 20" feet and 40" feet with a rooftop. Depending on the rental fleet, we have the availability for a 8, 6, 4 or 2 set up containerized workshop.

OVERVIEW

The best support keeps your project going

The Van Tunen workshops contains an office area, environmental (HazMat) container incl. drip trays, workshop containers and of course several spare part containers.

FACTS & FIGURES

AUXILIARIES

LIGHTSETS

Our heavy duty Lightsets are protected by robust frames, have lifting points for hook and forklift, have easy access to all maintenance points and an integrated leakage bin. (Optional with skids).

FUELTANKS

We supply save fuel tanks from 1 to 50 m3 capacity, double walled and robust build. On demand equipped with counter, quick fill pump and single or multiple fuel filters and water separators.

WATERTANKS

We supply save water tanks for construction and potable water up to 50 m3. On demand equipped with counter, quick fill pump and conservation station.

GENERATOR

Van Tunen can assist you with generators up to 2000 kVa equipped with sound proof casing, lifting points for hook and forklift, easy maintenance points and integrated fuel tank and leakage bin.

TELEHANDLER

For most project a 4x4 telehandler is ideal for daily small lifting and transonic jobs around the workshop and the project site. We can supply you with all types and sizes depending on your specific project needs.

SPECIAL TOOLS

Depending o your requirement we can equip the workshop with your special tools requirement. For example we can add a hydraulic hose station, power washer and a flagman station. Contact us for more information.
