## SAFETY FIRST - QHSE

Product Safety has been and continues to be proactive in developing machines that meet or exceed safety standards. Safety is an integral part of all machines and system designs.

### SAFETY FEATURES

- Convenient steps, handles and guardrail help you get on and off the tractor with greater ease. Access lighting can be turned on from a ground level switch
- New seat belt indicator enhances safety by reminding the operator to buckle up with a light/ alarm. Once the machine is in gear, a fault code will register through Product Link if the operator fails to fasten the seat belt
- Electronic fluid level verification at startup for coolant, power train and engine oil means you can make fewer trips up and down from the cab
- A standard Operator Presence detection system allows the machine to idle when the operator is not seated, but locks out the power train and front implements to avoid unintentional movement
- A rear vision camera and cylinder mounted mirrors are available to enhance visibility around the machine
- Backup alarm
